

MOLYKOTE® THE LATEST GENERATION OF SPRAY SOLUTIONS

Better performance with new folding nozzle design

To meet new industry demands, MOLYKOTE® has revamped its spray lubrication technology with an advanced packaging design and a new collapsible dispenser. **This innovation enables more precise application** for targeted lubrication while maintaining the ability to cover large areas effectively.

The new spray system offers numerous benefits in high-performance industries (Food, Automotive and Manufacturing):

- Reduces waste
- Simplifies maintenance
- Ensures excellent performance

Designed to deliver efficiency, compliance and sustainability, these advanced solutions combine innovative formulation with state-of-the-art packaging.

Whether for mechanical components under high loads, food production lines, or precision engineering applications, the new MOLYKOTE® solutions ensure optimal performance, longer equipment life, and superior productivity.

Four MOLYKOTE® high-performance spray products feature this new design.

1. MOLYKOTE® P-1900 FM Paste Spray

MOLYKOTE® P-1900 FM Paste Spray is a high-performance white spray grease designed for food and beverage processing machinery. It provides long-lasting lubrication for fasteners, threaded connections and injection molding pins. With its spray application, it reduces maintenance time and provides even coverage over large areas, while the bendable nozzle allows precise application in hard-to-reach places.

Key Features

- NSF H1 certification for incidental food contact (complies with FDA 21 CFR 178.3570)
- Outstanding corrosion protection, tested in salt spray for more than 100 hours
- Low coefficient of friction, ensuring reliable and repeatable fastening performance
- High temperature resistance, up to 300°C
- Simplified maintenance, reducing downtime and labor costs

2. MOLYKOTE® S-1002 Electrical Contact Cleaner Spray

MOLYKOTE® S-1002 is a high-performance spray cleaner ideal for cleaning electrical contacts, electronic components and sensitive surfaces. Its fast-evaporating formula removes dirt, oxidation and residue, reducing electrical resistance and improving circuit efficiency. Thanks to its compatibility with plastic, rubber and painted surfaces, it ensures effective action without damaging materials.

Key Features

- Fast and residue-free evaporation for immediate and halo-free cleaning
- Reduced electrical resistance, improving the conductivity of contacts
- Non-aggressive formula, safe on plastics, rubbers and delicate surfaces
- Targeted application, ideal for electronic components and sensitive environments

3. MOLYKOTE® Food Machinery Oil Spray

MOLYKOTE® FM Oil Spray is an NSF H1-certified lubricant designed for chains, guides and conveyor systems in the food and packaging industry. Its advanced formulation provides exceptional protection against wear and tear, ensuring long-lasting lubrication even under humid conditions and frequent washdowns.

Key Features

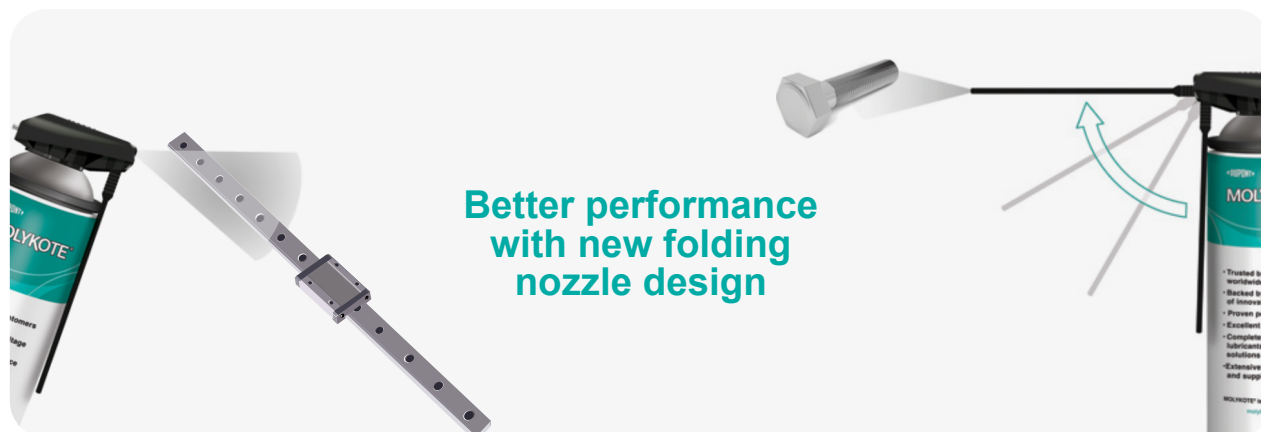

- NSF H1 food certification, safe for incidental food contact
- Superior penetration, reaches deep into components for effective lubrication
- Runoff resistance, maintains performance even in wet environments
- Wear protection, to reduce the risk of failure and extend component life
- Good corrosion protection, ideal for industrial applications

4. MOLYKOTE® Multigliss Spray

MOLYKOTE® Multigliss Spray is a versatile lubricant formulated to protect metal components from wear and corrosion. Ideal for industrial applications and maintenance, it reduces friction, eliminates squeaking and extends equipment life.

Key Features

- Effective lubrication for hinges, locks and sliding mechanisms
- Anti-corrosion properties, to protect equipment in harsh environments
- Optimal penetration, reaches even the most hidden parts
- Compatibility with various materials, ideal for multiple applications
- Eco-friendly formula, designed to reduce environmental impact

LEARN MORE ABOUT

Founded in 1948, ULBRICH GROUP is committed to providing advanced technological solutions for industrial lubrication and maintenance. Thanks to our long-standing partnership with MOLYKOTE®, a leading global brand, we offer our customers a wide range of high-performance solutions.

We support companies in choosing the best solutions with a team of experts to improve efficiency, reliability and sustainability in their production processes. Learn more about our offerings and find the right product for your needs at www.ulbrich-group.com
